

NAYANA B

+91 9110689920 | nayanab949@gmail.com | [LinkedIn](#) | [GitHub](#)

Bengaluru, India

Professional Summary

MCA graduate with strong knowledge of Java, Python, SQL, Data Structures, Object-Oriented Programming, and Software Development. Hands-on experience through internships and academic projects in application development, machine learning, and data analysis. Strong analytical, problem-solving, and teamwork skills with a passion for building scalable software solutions.

Education

AMC Engineering College, Bengaluru

Dec 2024 - Jul 2026

Master of Computer Applications (MCA), Percentage: 84.17%

- Specialization: Data Science

BGS First Grade College, Mysuru

Oct 2021 - Jun 2024

Bachelor of Computer Applications (BCA), CGPA: 8.80

Experience

Scontinent Technologies Pvt. Ltd.

Feb 2026 - May 2026

AI/ML Intern

Bengaluru, India

- Developed 5+ machine learning and deep learning models in Python and TensorFlow for classification tasks across two client projects, improving validation accuracy by 6% through CNN hyperparameter tuning.
- Engineered end-to-end preprocessing, training, and evaluation pipelines, cutting manual data-prep time by approximately 30%.
- Tuned hyperparameters on CNN-based computer vision models, improving validation accuracy by 6%.

SpatialHawk Geoinformatics Pvt. Ltd.

Mar 2024 - May 2024

Data Analytics Intern

Bengaluru, India

- Cleaned and processed 10+ geospatial datasets using Python, Pandas, and NumPy, improving data quality for downstream analysis.
- Ran exploratory analysis on regional datasets, surfacing 3 key trends that informed senior analysts' recommendations.
- Delivered weekly visual reports and dashboards in Matplotlib, presented to a 5-person analyst team.

Projects

Heart Disease Prediction Using Machine Learning

Python, Scikit-learn, Random Forest

- Benchmarked Logistic Regression, Decision Tree, Random Forest, and SVM models, achieving 89% accuracy with Random Forest after feature selection and cross-validation.

AI-Based Driver Drowsiness Detection System

Python, OpenCV, MediaPipe, Computer Vision

- Developed a real-time alert system using facial landmarks and Eye Aspect Ratio analysis, reaching 94% accuracy with a 0.5-second response time.

Plant Disease Detection Using Deep Learning

Python, TensorFlow, Keras, OpenCV, CNN

- Trained a CNN model on 5,000 leaf images to classify 10 plant diseases, reaching 91% accuracy via transfer learning.

Sakhi Suraksha - Women Safety Application

Java, Android Studio, Firebase, GPS API

- Shipped an SOS app with shake/voice-triggered alerts and GPS tracking, sending live location to 3 emergency contacts within seconds.

Technical Skills

Programming: Python, Java, SQL, C, HTML, CSS, JavaScript

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC

AI/ML: Machine Learning, Deep Learning, Computer Vision, NLP, Scikit-learn, TensorFlow, Keras, PyTorch, OpenCV

Data Analysis: Pandas, NumPy, EDA, Data Preprocessing, Feature Engineering, Data Visualization, Statistics, Excel

Cloud & Tools: AWS, Azure, Docker, Git, GitHub, Jupyter, VS Code, Power BI, Tableau

Databases: MySQL, Firebase, REST APIs, JSON

Certifications

- IBM:** Python for Data Science
- Udemy:** The Web Developer Bootcamp
- Udemy:** AI Engineer- LLM Engineering, RAG, QLoRA, Agents
